Challenge
Information Management

The working environment is changing. More and more complex structures increase the time needed for analyzing information. If nothing else, the trend for collaborating across several locations presents us with the challenge to keep an eye on information from different sources. Staying in control without meticulously browsing through never ending excel tables and statistical analysis seems almost impossible. Solely deciding which key figures to monitor in order to feel the sensation of having everything under control is a challenge.

Always Optimally Informed - Independent of Location and Just in Time

With the state-of-the-art web application cockpit4med you always have an eye on your management data anyplace and anytime due to its accessibility via any web browser, even on mobile devices. Thus you are always in control of your radiological workflow. cockpit4med extracts data from different sources and presents user-friendly and meaningful information. This software uses the latest technologies, is modular and supports all medavis applications, e.g. medavis RIS. Advantages: You can access your individual data, but you don’t have to process them yourself. The cockpit4med starter package already provides you with a selection of the most important gadgets.

cockpit4med Helps You to Manage a Modern Radiology

Access information quicker for efficient management of your radiological workflow - anyplace and anytime.

Do you know your occupancy rate or how long the queue at the CT is? Do you know how many patients are in your practice right now and what their examination status is? Do you know how long a private patient waits for his report after the examination? And - do you always have an eye on how many open report orders are on the worklists of your colleagues - especially in case of illness?

Important Workflow Information Ready at Hand

cockpit4med enables you to manage your radiological workflow quickly and effectively by providing you with important information in real time. Displaying data in real time and in graphically optimized diagrams facilitates the quick analysis of important factors, accelerates the deduction of measures and shortens your reaction times.
Registration
With cockpit4med you will not only know the waiting time of your patients but you will also know how many patients are waiting for an examination per modality.

Examination
Your average occupancy rate is displayed as weekly and daily overview.

Evaluation / Workstation Physician
You always know how many examinations have to be evaluated or are ready to be released.

Management
At all times, a list showing your top referrers or average occupancy rate keeps you fully in the picture.

IT
Thanks to cockpit4med, you have an overview of the status of your messages. Errors can be recognized and fixed early on.

Referrer Portal
In addition to a network with medavis RIS, a connection to the portal4med REFERRER PORTAL gives you the possibility for further monitoring. You always have all activities in your portal4med REFERRER PORTAL available at a glance.

Analysis Made Easy
Thanks to modern software technologies, you have access to a wealth of information which you can use profitably for management decisions and optimizing your workflow. Often, there is not enough time to view and analyze this information. cockpit4med supports you by providing important facts at a glance. You can quickly access a list of top referrers, an overview of the current message queues (HL7, fax, e-mail etc.) or open orders from other systems (e.g. HIS).
Since 1997, medavis has been synonymous with medical IT that goes the extra mile:

▪ State-of-the-art software technology
▪ Future-orientated, scalable and upgradable IT processes
▪ Customized services
▪ IT experts in radiology process optimization and network architecture
▪ High-performance products with depth of functionality
▪ Long-standing project experience
▪ Top-class customer service with qualified staff

Imaging centers, hospitals, clinic chains and teaching institutions in Germany and abroad – over 600 medical institutions of all sizes already rely on our radiology workflow solutions by medavis.
