## RADIOLOGY WORKFLOW SOLUTIONS

# Goodbye CD. Hello Patient Portal.

More than ever before, it is important for patients today to be able to handle their own data in a self-determined manner. The portal4med Patient Portal enables patients to access their own radiological images and reports online and to make them available to treating physicians quickly and easily. Patients themselves decide who gets to see the data.

The advantage for your radiology: The portal4med Patient Portal eliminates the need for costly and time-consuming CD burning. In this way, the Patient Portal supports you in working more economically, efficiently and sustainably.

Through its seamless connection to medavis RIS, the portal4med Patient Portal is perfectly integrated into the

radiology workflow. At the registration desk, an access ticket to the portal is generated. The ticket can be transmitted digitally via e-mail or it can be printed and handed out to the patient. It is also possible to automatically include the access data in the report.

This eliminates the effort and cost of burning CDs. After the examination, patients can leave the radiology department directly without having to wait again at the registration desk for a CD.

If the patient ticket is lost, the data access authorization can be cancelled in the patient portal.

## Benefits for Radiologists

- ➔ Replaces the costly and time-consuming burning of CDs
- ➔ Modern service for your patients
- ➔ Digital access ticket without additional effort at the registration desk
- ➔ Complete integration into your workflow with medavis RIS
- ➔ Digitization of another workflow step
- ➔ Transparent and secure handling of medical data thanks to encrypted data transmission
- ➔ Certified security after extensive penetration tests

# Easy Online Access for Patients

## Benefits for Your Patients

- ➔ Access to the portal from any Internet-enabled device with a common web browser
- ➔ Patients can view all of their own reports and studies available at your radiology
- ➔ Integrated report and image viewer
- ➔ Data sovereignty: self-determine which doctors get access
- ➔ Further treatment starts faster: no forgetting/importing of CDs
- ➔ Secure data access through 2-factor authentication
