

Authorisation of Annunciators for the medavis Service Center

Organisation:

Name:

Address:

With the medavis Service Center, medavis provides a communication channel within the scope of their maintenance contracts. The customers can use it to contact the medavis Support Team efficiently and retrace the current processing status of their request.

There are software maintenance contracts between the organisation and medavis.

In the name of the organisation, I hereby authorise the persons listed below (annunciator) to place incident reports for medavis via the medavis service center, order services and access and edit respective documentation, feedback and status information.

You will receive access to the files and material in the medavis Service Center.

Our organisation will make sure, that the named annunciators have accounts with administrator permissions for the medavis products used within the respective organisation and have received respective training.

I agree that the granted access permission can only be revoked in writing.

The medavis GmbH reserves the right to deactivate access permission to the medavis Service Center at all times and will inform the organisation in this case.

List of Authorised Annunciators of the Organisation

Please note, that we can only register annunciators with personalised access. For this, it is necessary to name a personalised e-mail address and the direct extension number. For systemic reasons, we cannot register jointly-used e-mail addresses.
